Shared Spending Address Finder

This program finds BTC addresses with shared spending and outputs balances of all shared addresses

Uses API from Blockchain.info

Created by: Arghya Mukherjee and Codi West

Running the program with Python 3

Use the `BlockchainP1_py3.py` file

Run with:

```
python BlockchainP1_py3.py
```

Settings:

- Set global settings near the top of the file
- Set BTC address list to check at the bottom of the file

Running the program with Python 2

Use the `BlockchainP1_py3.py` file

Run with:

```
python BlockchainP1v4.py
```

Settings:

- Set BTC address list to check at the top of the file
